Good Evening –

Nonresponsive Text Redacted

Attached please find [REDACTED]
[REDACTED] (2) information
regarding upcoming sediment sampling at OU-1.

[REDACTED]

[REDACTED]

Sediment Sampling: EPA believes it is appropriate to collect sediment samples given the heavy rain event that occurred in Bridgeton. Attached is an EPA-approved QAPP for this sampling event that includes a map with proposed sampling locations. While EPA is ready to have our contractor perform this work within the next week or two, we understand that the PRPs may be interested in taking the lead on this sampling event. If so, EPA would expect the work be performed as outlined in the

attached QAPP, and EPA would be prepared to collect split samples. If the PRPs do not wish to perform this sampling, you of course will similarly have the opportunity to collect splits of EPA's samples. Please advise by COB Friday March 4th if the PRPs would like to perform this sampling.

As always EPA appreciates your continued cooperation, especially as we all focus on multiple Site-related activities at this time. If you have any questions please do not hesitate to contact me at my number below.

Regards,
Alyse
